## Professional Summary

Full-Stack Developer and Computer Science undergraduate with hands-on experience building web applications using the **MERN stack**, **Next.js**, and **TypeScript**. Experienced in developing **REST APIs**, authentication, database integration, real-time communication, payment integrations, and responsive user interfaces. Exploring **Generative AI**, **Retrieval-Augmented Generation (RAG)**, and **AI agents** using LLM APIs. Solved **300+ Data Structures and Algorithms problems** on GeeksforGeeks.

## Technical Skills

**Programming Languages:** Python, JavaScript, TypeScript, C++, Java, Go, SQL, Solidity

**Frontend:** React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Redux Toolkit

**Backend:** Node.js, Express.js, Django, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Socket.io

**Databases:** MongoDB, Mongoose, PostgreSQL, MySQL, Firebase

**AI and Generative AI:** RAG, AI Agents, Prompt Engineering, LLM APIs (OpenAI, Gemini, DeepSeek), Embeddings, Vector Search, LangChain, LangGraph, NLP, TensorFlow

**Cloud and Developer Tools:** Git, GitHub, Docker, AWS Lambda, AWS S3, Cloudflare R2, Vercel, Postman, Cloudinary

**Integrations:** Razorpay, Leaflet Maps, WebRTC

## Projects

**Food Delivery and Live Tracking Platform** GitHub | Live Demo

- Built a full-stack food delivery platform supporting **3 user roles**: Customer, Restaurant Owner, and Delivery Partner, with order management and delivery coordination workflows.
- Implemented **real-time order updates** and **live GPS tracking** using Socket.io and Leaflet, with **MongoDB 2dsphere indexing** for geospatial proximity queries.
- Integrated **Razorpay payment verification** and **Cloudinary media management** to support checkout and image uploads.
- **Technologies:** React.js, Node.js, Express.js, MongoDB, Socket.io, Redux Toolkit, Razorpay, Leaflet, Tailwind CSS.

**Grovli – Full-Stack Quick Commerce Platform** GitHub | Live Demo

- Developed a quick-commerce grocery delivery application supporting **Customer, Admin/Store Manager, and Delivery Partner** workflows for order management and delivery coordination.
- Implemented **real-time order dispatching** and delivery tracking using Socket.io and Leaflet Maps, with centralized cart state management using **Redux Toolkit**.
- Integrated **Razorpay checkout**, **JWT-based authentication**, and **Role-Based Access Control (RBAC)**, alongside Cloudinary media management.
- **Technologies:** Next.js, React, TypeScript, Node.js, MongoDB, Mongoose, Socket.io, Redux Toolkit, Razorpay, Tailwind CSS.

**Chatly – Real-Time Chat and Video Calling App** GitHub | Live Demo

- Developed a real-time communication application featuring **individual chats**, **group workspaces**, and **WebRTC-based video calling**.
- Built communication features focused on **real-time messaging** and collaborative group interactions using the technologies implemented in the application.
- **Technologies:** Add the verified technologies from the repository, such as React.js, Node.js, Express.js, MongoDB, Socket.io, and WebRTC.

## Education

**Guru Ghasidas Vishwavidyalaya** Bilaspur, India
B.Tech in Computer Science and Engineering Expected Graduation: 2027

- **Relevant Coursework:** Data Structures and Algorithms, Database Management Systems, Operating Systems, Computer Networks, Computer Organization and Architecture.

## Achievements

- Solved **300+ Data Structures and Algorithms problems** on GeeksforGeeks, strengthening algorithmic thinking and problem-solving skills.
- Built and deployed full-stack applications using **React.js, Next.js, Node.js, Express.js, and MongoDB**.
- Used **Git, GitHub, Postman, and Vercel** for version control, API testing, debugging, and deployment.
